About me

// who is behind the screen

I have been programming since 2025. I like building apps that actually do something, not code for the sake of it. I do web when needed, but software and games are what pull me most.

I am looking for an internship at a company that needs to maintain or build software, where I can show what I already do and grow.

2025
programming since

C# / .NET
main focus

Grade 11
Programming and IT Systems Management

02 ✦

What I can do

// two constellations

Sol
front-end and design

✦ HTML ✦ CSS ✦ Figma

Lua
code, data and tools

✦ C# ✦ .NET ✦ Visual Studio
✦ APIs ✦ MongoDB ✦ GitHub

learning:

Unity · C++ · Blueprint · Kotlin

03 ✦

Projects

// what already shines

01
STAP

C# · MongoDB · API

Marketplace to buy, sell and swap products through listings with photos and descriptions. A school project still in development, with a working core connected to MongoDB. The STAP API collects and serves the data behind its features.

github.com/yeezy3R/STAP
github.com/yeezy3R/STAP_API

02
Caos Programado

C# · JSON

Lightweight arcade app with classic games (Tic-Tac-Toe and Ping-Pong), JSON-based login and an admin control panel.

github.com/yeezy3R/Caos-Programado

03
NOX

C# · .NET

Simple stock management app to organise product inventory, with a login screen for access control.
